

WAR SAVINGS COMMITTEE OTTAWA

An army of 2,000,000 regular "War Saver" is sought in a national "Smash Hitler" campaign now opening by the War Savings Committee. It is announced by Messrs W. R. Somerville and de Gaspe Beaubien, National Chairman.

To enable every man and woman in Canada to join this "Army of Two Million Regular War Savers" the Committee has developed, in collaboration with the chartered banks, a special Pledge Form which will be delivered by mail to over 2,500,000 householders from coast to coast. This is one of the largest single mailings ever carried out by the Canadian Postal Service.

By using this new War Savings Pledge Form any bank depositor can instruct his bank to invest in one or more War Savings Certificates for him on the 15th of every month. Once the Pledge is signed and handed to the bank, the regular purchase of War Savings Certificates becomes automatic. The purchase price of the Certificates is deducted each month from the account sent by the bank to Ottawa, and the certificates delivered by mail to depositor's home address or to any other address he may designate.

"This new Pledge plan", states the announcement by the Joint National Chairmen, provides man or woman with an ideal means both of saving money for his own future use, and at the same time of helping directly in Canada's war effort. Most people have found that it is far easier to make a resolution to invest in War Savings Certificates every month than it is to keep that resolution. By using the new Pledge form, the individual overcomes this human weakness, and having signed the Pledge form, the individual overcomes his weakness, and having signed the pledge knows that regular investment in War Savings Certificates every month will from then on be automatic.

"In connection with this plan, the War Savings Committee hopes to impress upon all Canadians the fact that when they buy these Certificates they are not giving their money, but lending it, at a reasonable return to themselves. That return amounts to a full 25 per cent in 7 1/2 years. We hope by the end of the year at least two million people will have taken advantage of this new and useful means of building up a reserve of savings for the future.

FIFTH COLUMNIST DEFINED BY CLARE BOUTH

"The fifth columnist is the man who sees nothing worth fighting for except the small piece of ground on which he stands, because he refuses to see that small piece of ground is all of a piece with the whole world, and that which happens in the heart of the Eastern Hemisphere must have its repercussions in the Western Hemisphere in a violence in proportion to which they happen there." — Miss Clare Bouth, in the Radio Series "LET'S FACE THE FACTS"

Victory Wheel Spins From Atlanta

Calgary, Sept. 23
From away down in the deep south, in the land of Scarlett O'Hara and Rhett Butler, American money has found its way 1500 miles to Calgary to aid in the Canadian war effort.

This morning the operators of the popular "Victory Wheel" program at radio station CFAC were surprised when they received a letter from the staff of White Motors, Atlanta, Georgia — the envelope contained four dollars — enough to buy 16 chances on the "Victory Wheel".

WHEAT SITUATION

The features of the past week were: the latest estimate that the United States crop would total 760,623,000 bushels and, with a carryover of 284 million bushels from last year, the total supply in that country is around 1,044 million bushels. The announcement that the total Canadian wheat carryover was approximately 300 million bushels.

With a crop of better than 400 million bushels in sight in Western Canada, this country will have at least 350 million bushels available for export and carryover, while the United States will have around 360 million bushels for export and carryover, a grand total of approximately 960 million bushels surplus.

World trading is proceeding at low volume and the future of wheat is as dark as Erebus. In these epoch-making

LOCAL NEWS

The Ladies' Card Club met on Tuesday evening at the home of Mrs. Peyton. Honors were shared by Mrs. Cooley and Mrs. Robin. The Card Club will meet next week at the Peyton home with Mrs. Pfeiffer as hostess.

Dr. and Mrs. Sawyer were weekend visitors at the home of Mr. and Mrs. E. Sawyer.

A very enjoyable Rally Day service was held last Sunday in Chinook United Church. The singing of the choir, consisting of high school girls trained by Mrs. Isbister, was very inspiring and well rendered. Rev. Barret delivered an address on "Serving the Lord with Gladness" which was the theme of the whole service. The only disappointing thing about the service was the attendance. The children were well represented but the adults were conspicuous by their absence.

A congregational meeting will be held next Sunday in the United Church right after the service to appoint the staff for the Sunday School for the next year. Let everyone turn out and support this worthy institution.

Miss Byler and Jean Mortimer motored to New Bridgen where they spent the week end.

Mr. C. E. Neff and son Edmond who visited the Stewart families at Radium this week were Chinook business visitors Wednesday.

times all that can be done is to meet each situation as it arises and carry on under the hope that things will work out sooner or later.

God Saved The King

By Charles F. Laine, Bissano, Alta.

We've often sung God Save the King,
And sung it as a prayer —
That Thou would'st round our Monarch fling
Thine all protecting care.

And as we've sung that ancient song,
The thought was thus implied —
That Thou would'st save All who belong
To our great Empire wide.

We thank Thee, Thou who givest breath
That Thy great power is such,
That Thou hast saved from cruel death
Our King we love so much.

For Thou Deliverer great unseen,
Who did'st so interpose
To shield our Empire's King and Queen,
Art mightier than our foes.

By this our faith is steadfast set
That Thou wilt Victory bring,
And Thou wilt save our Empire yet —
For Thou hast saved our King!

Agriculture's Future

The future fortune of agriculture in Western Canada is a topic which affords wide scope for speculative thought. How is it going to fit into the Canadian, the Empire and world economy for the next few years if the war proves to be a long one, and what trend will it follow to be most useful and valuable after the fight has been won and the world gradually settles down to a more or less permanent stabilization?

These are questions which are being asked by a good many people and which are causing a good deal of searching of brains for answers which may or may not be correct. Various theories are being advanced, some of which may be the key to the future, some of which undoubtedly are not. It is one of those problems to which the old adage, "Hindsight is easier than Foresight" applies with strong impact.

Unfortunately the solution is dimmed by obscurity. We see through a glass darkly when this question is approached. There are so many unknown factors that at present no clear cut answer can be given. The problem bristles with imponderables, and it is this very fact that gives consideration to the question a good deal of glamour for the theorists.

The Paramount Objective

When this problem is revolved in the mind, however, one thing is immediately clear and definite. It stands out like a beacon light. And that is the playing its full part in the winning of the war as the immediate and imperative objective of Western Canadian agriculture, which means the ample provision of foodstuffs to meet the needs of Great Britain and of those who actively become the active Allies of the Empire as and when they are released from the yoke of the oppressor.

That is one of the duties which has been assigned to and cheerfully and gladly accepted by this country. It is the paramount job in hand for Western Canada, for, as has been very appropriately stated as an unquestionable verity—there is no future for Western Canadian agriculture unless Britain and Canada win this war.

Not only must this war be won, but it must be pushed to such an ultimate finality as to preclude the possibility of any recurrence of the invasion of human and national liberties for a hundred years. This objective lengthens the period of service which Western Canada can render the twin causes of humanity and democracy.

It is conceded that at the moment the problem of the storage and disposition of a big wheat surplus appears to be an acute one, but it is one which will be dissipated as the war runs the course which has been mapped out for it, and the time will come when every bushel of this apparently huge surplus will be required.

Vast stores of foodstuffs which had been warehoused in Britain from other available sources will disappear and have to be replaced, to feed the civilian population as well as the fighting forces. When the war is transferred to continental Europe and British troops press towards Berlin, it will become Canada's responsibility to feed the troops of Allied countries as well as their civilians and the number of these Canadian wards may be expected to increase with rapidly after the offensive gets well under way.

Even after the war is over and peace terms are imposed on the enemy it is reasonable to expect that there will be great need on continental Europe for large quantities of Canadian agricultural produce, and perhaps for some considerable time. In many of the countries now under Hitler's heel, agriculture has been stripped and ruined, and further enemy devastation may be expected as the goose-stepping hordes fall back to their own country. Fields have been laid waste, livestock decimated and labor conscripted and more of this kind of thing may be expected while the enemy is in retreat.

The only thing that will prevent further serious damage to agriculture in Nazi-held continental Europe will be sudden, wholesale collapse of the German arms, and it is possible that this may be brought about by the predicament of European agriculture itself, combined with successful blockade and incessant pounding by the R.A.F. Even in that event it will be some time before agriculture can be fully reinstated in the Nazi-conquered countries.

When It's All Over

When the war is happily won and when the Nazi-conquered nations are once again able to fend for themselves in greater or less degree, then perhaps Western Canada will face the necessity of making some changes in its agricultural economy.

It is not amiss to give some thought to the future and to provide for some insurance policy against that day as and when circumstances and conditions permit and provided that it is not allowed to impede the first and major objective.

If some of the lost markets will never be returned, it may be that in future, greater diversification will be the answer to the question which will then arise. It may be necessary to provide for more domestic markets for more diverse agricultural products and perhaps the solution of domestic markets will lie in greater industrialization of the west. That may necessitate greater development of power from millions of tons of lignite in southern Saskatchewan, from the oil fields of southern Alberta, and the waters north of the prairies. Means may be found to produce power cheaply enough to more than offset the freight cost of sending raw materials east and bringing them back in manufactured form, as for instance, hides and shoes.

Seems Characteristic

"Hitler cannot conquer Britain." The statement is similar to that made by Lord Chatham in the House of Lords during the American war of revolution when he said "My Lords you cannot conquer America... I am an Englishman I would never lay down my arms, never, never, never." The thing seems to be a sort of Anglo-Saxon characteristic.

An individual is not intoxicated by alcohol until it courses through his blood stream and reaches the brain.

FEMALE PAIN

Women who suffer painful, irregular periods with nervous, moody spells due to functional causes should find Lydia E. Pinkham's Vegetable Compound most helpful to relieve such distress. Pinkham's Compound is especially helpful to help weak, tired women get on going three difficult days. Over 1,000,000 women have reported amazing results. Write for FREE TRIAL!

British People Work Hard

Keep Devising Ways To Raise Funds For More Planes

There is apparently nothing Britons won't do to keep money flowing into the many "Spitfire Funds" that have sprung up to buy fighter planes for the Royal Air Force.

Here are some of the things they have done:

A woman in Northern Ireland presented two goats to the organizers of one fund. They were sold at auction and brought nearly £50 (\$222.50). Other gifts included a gander, a pedigree Yorkshire cow, a greyhound and a donkey.

Based largely on shilling contributions, the fund reached £30,000 (\$133,500.00) in 11 days—enough to buy a plane for each of the counties in Northern Ireland. An entire squadron is now to be raised.

Housewives of Hendon, birthplace of British aviation, arranged for 1,000 tea parties to raise £20,000 (\$89,000). A group of persons who saved postage by delivering letters by hand contributed £20 (\$89) to a fund.

The proprietor of a fish and chip restaurant gave to the Hendon fund the whole of his midday taking for one week. Shopkeepers in one area are giving the profits on the sale of shilling aerial battle jigsaw puzzle. Prize bulldog called Spitfire was sold in behalf of another fund.

Leicester Hosiery Manufacturers' Association raised £5,000 (\$22,250) to buy one machine. The National Federation of Hosiery Manufacturers' Association announced a national fund in connection with the industry and within 24 hours the Hinkley Hosiery Manufacturers' Association raised £500 (\$2,225).

Within 36 hours of a meeting members of the Wholesale Fashion Trades Association more than £5,000 (\$22,250) was raised—enough for one plane and something towards a second.

Vigilance Needed

Forest Fire Prevention Will Aid Out War Effort

Vigilance against forest fires can help win the war, according to the Dominion Forest Service, Department of Mines and Resources, Ottawa, which reports that approximately 86 per cent of forest fires in Canada are started by human agencies. In an average year more than two million acres of forest land are burned over in Canada, destroying the resources of a great primary industry which has assumed even greater importance during the present war.

During the present conflict the export of Canadian wood, pulp, paper, and other wood products to the United States is providing a large amount of foreign exchange which is being used for the purchase of essential war supplies. As the United Kingdom has been cut off from its former sources of wood supply in northern Europe, Canada is now filling the breach with the products from her forests, not only for normal use but also for specialized lines connected with Empire defence. In addition, Canada's own war effort is calling for vast quantities of lumber, which are being readily obtained from her forests. The ability of Canada's forests to meet these demands is of extreme strategic value at present, and protection of the forest resources at this time against destructive fires provides an excellent opportunity for the exercise of patriotism.

Training Schools

Four New Centres Opened In Western Canada

Opening of instruction at four new training centres in western Canada will bring the total number of schools now in operation in the dominion to 33, the Royal Canadian Air Force announced.

Students from elementary flying training schools reported for training at No. 4 services flying training school at Saskatoon before the official opening of the school, while No. 3 air observers' school at Regina and No. 2 wireless school at Calgary will also become working parts of the British Commonwealth Air Training plan.

Also at Calgary No. 11 equipment depot, a storehouse of aviation supplies and equipment for all R.C.A.F. training centres in that area, will be open. By the end of 1940, a total of 48 training schools will be in operation.

A mysterious Johannesburg donor has sent three gifts of a million cigarettes each to British fighting forces. Each packet contains card: "Greetings from Gertrude."

Nearly 50 steels and irons, each having a different chemical composition, are included in the stainless steel family. 2378

Great Aid To Aviation

Balloons Used To Collect Data For Safe Operation

Carriers for the first pamphlet raids on Germany started from Canada during the first Great War. At that time the leaflets travelled in small rubber balloons which were inflated with hydrogen and when the wind was right were released where they would float over German territory. There they would rise to great heights, says an article in the August issue of C-I-L Oval, until they burst and let the leaflets flutter down to be read by curious Germans over wide areas.

Like worthy old soldiers, these Canadian-made balloons have passed on those early duties to others and have been promoted to new important work. To-day they explore the weather of the upper air for the benefit of their mighty winged successors. They chart safe airways for civil fliers, and as targets, sharpen the sting of fighting fighters and anti-aircraft gunners.

Each day these useful indicators are released from vast stations and airports across Canada, to determine the height of clouds, the ceiling of the air force and civil flyer, wind direction, velocity and other data important to the safe and efficient operation of air transportation and weather prediction.

Education Week

Dominion-Wide Movement To Foster Interest In School Problems

Education Week has been observed for several years in Canada. This year it is held in the week of November 10 to 16.

The general theme is "Education for Defense, Democracy and Peace." On Sunday, November 10, the churches lead off with discussion of "The Three-Fold Partnership—the Home, the Church, the School." Other topics are: Nov. 11, "Inculturing Civic Loyalties"; Nov. 12, "Fostering Public Education"; Nov. 13, "Developing Human Resources"; Nov. 15, "Changing Methods of School Administration"; Nov. 16, "Building Economic Security."

During the week there will be broadcasts, both Dominion and local. Clubs of all kinds will have speakers discuss educational topics and problems, while many centres will hold public meetings with appropriate programmes. Teachers and students will be hosts to parents and citizens that the latter may see just what is being attempted in the modern school, as well as what remains to be done.

SELECTED RECIPES

BUTTERSCOTCH TARTS

1 cup brown sugar
3 tablespoons Durham Corn Starch
1/2 teaspoon salt
2 cups hot milk
2 eggs
1 teaspoon pure vanilla
3 tablespoons soft butter
Baked tart shells
Whipped cream and nuts (optional)

Combine brown sugar thoroughly with corn starch and salt. Slowly stir in hot milk. Stir and cook in double boiler until mixture has thickened smoothly. Cover and cook, with occasional stirring, until no raw flavor remains. Stir into the slightly-beaten eggs, return to double boiler and stir until eggs have thickened. Remove from heat and add vanilla; stir in butter, bit by bit. Cool partially, then turn into baked tart shells and chill for serving. May be topped with whipped cream and nuts.

PRUNE WALNUT PUDDING

1 cup cooked prune pulp
1 cup prune juice
1 cup boiling water
1/2 cup sugar
1/2 teaspoon salt
1/2 teaspoon cinnamon
18 Christie's Lemon Wafers
1/2 cup chopped walnut meats
2 egg whites

Combine prune pulp and juice, add boiling water, sugar, salt and cinnamon. Bring to boiling point and add finely crumbled wafers and nut meats and stir. Beat egg whites stiff and fold hot mixture into them. Pour into a buttered but by bit. Cool partially, then turn into baked tart shells and chill for serving. May be topped with whipped cream and nuts.

No Neutrality In This Struggle

"I declare that for me neutrality of heart is impossible in this struggle. I see it as a great struggle between light and darkness. Whatever be the details of controversy between contending nations, fundamentally this fight is for the things of the spirit, not for material gain, not for strips of territory." — Cardinal Hinsley Archbishop of Westminster.

Resourceful Canada

A British Columbia gardener has found paprika a valuable crop, several districts in Ontario are specializing in broom corn, and for the first time mustard seed is being produced in a Scotch district. The mustard which has come regularly from England is now banned for the duration.

For Testing Aircraft Models

Large Wind Tunnel Will Take Wing Span Of Eleven Feet

One of the largest and most complete wind tunnels in the world is now being built by the Lockheed Aircraft Corporation, manufacturer of the 15 planes in the Trans-Canada Air Lines fleet and the six larger ones recently ordered. The tunnel will be about 400 feet long and capable of testing models with a wing span of 11 feet. All will be forced through the tunnel at a maximum speed of 200 miles an hour.

Wind tunnel models of aircraft are made to exact scale and the flow of air about them is exhaustively studied with the object in view of producing planes offering minimum resistance and obtaining maximum lift and control from the air.

Museum Treasures Safe

Were Removed From Buildings In London Over Year Ago

Officials said the priceless treasures of two famous but unarmoured museums bombed recently by the Germans, had been moved along with the contents of other galleries, to specially constructed repositories in August, 1939.

"There has been no damage to any of them. They are secure from any bomb," officials said.

The same precautions were taken with the contents of scores of private galleries, warehouses and antique shops.

The Park Lane Mystery

By Edgar Wallace

Copyright, by Edgar Wallace. Serialized by Ledger Syndicate.

CHAPTER XVIII

The two detectives waited until a taxicab had been hailed; they drove into Palace Yard at the moment Sir Joseph's car was moving back to the rank.

"I don't see why you pulled me away from that party, Carlton," grumbled Elk. "Look on this picture and look on that! Look at gay Park Lane and dirty old Westminster!" And then, when his companion did not reply, he asked anxiously: "Something wrong?"

"I don't know. I've only a sort of feeling that we're going to see an earthquake—that's all," said Jim emphatically, as they passed into the lobby.

Sir Joseph was in his room and could not be disturbed, a messenger told them. Jim had signed tickets and they passed into the chamber and took a seat under the gallery.

The House was well filled, except the Government benches, which, save for the presence of an Under-Secretary deeply immersed in the contents of his dispatch box, were untenanted. Evidently some motion had been put to the House and the result announced just before the two visitors arrived, for the clerk was reading the terms of an interminable amendment to a water and power bill when Sir Joseph strode in from behind the Speaker's chair, dropped heavily on the bench and, fixing his horn-rimmed pince-nez, began to read a sheet of notes which he carried.

At that moment somebody rose on the Opposition front bench. "Mr. Speaker, I rise to ask the right honorable gentleman a question of which I have given him private notice. The question is: Has the right honorable gentleman seen a statement published in the Daily Megaphone to the effect that relationship between His Majesty's Government and the Government of France are strained as the result of the Bonn incident? And will he tell the House whether such a statement was issued, as is hinted in the newspaper account, with the knowledge and approval of the Foreign Office?"

Sir Joseph rose slowly to his feet, took off his glasses and replaced them again, nervously gripped the lapels of his coat and, leaning forward over the dispatch box, spoke: "The right honorable gentleman is rightly informed," he began, and a hush fell on the House.

"Are you sure?" asked Jim incredulously, thinking the butler had orders to rebuff all callers. "Positive, sir. Why is anything the matter?" asked the man in alarm.

Jim did not wait to reply. They found a cab in Whitehall and went beyond legal speed to Park Lane. There was just a chance that the Foreign Minister had returned to Harlow's. When they reached Green-hart House there came to them the strains of a jazz band; dancing was in full swing, both in the library and in the large drawing room overlooking Park Lane. They found Harlow after a search, and he seemed the most astonished man of all.

"Of course, he hasn't come back here. He told me he was going to the House and then home to bed. What has happened?"

"You'll see it in the newspapers in the morning," said Jim curtly, and drove back to his glasses and replaced them again, nervously gripped the lapels of his coat and, leaning forward over the dispatch box, spoke:

"The right honorable gentleman is rightly informed," he began, and a hush fell on the House.

"Yes, I've heard all about it," he said, in his thin, rasping voice. "Where is Sir Joseph?"

He beckoned Jim, who was known to him, and, pushing his way through the crowd of members, went back

Members looked at one another in amazement and consternation.

"There does exist between His Britannic Majesty's Government and the Government of France a tension which I can only describe as serious. So serious in fact, that I have felt it necessary to advise the Prime Minister that all naval and military Christmas leave shall be stopped, that the Defense of the Realm Act shall be reintroduced and that all naval reserves shall be immediately mobilized."

A moment of deadly silence. Then a roar of protest. There was hurled at the Government benches a hurricane of indignant questions. Presently the Speaker secured silence, and Sir Joseph went on, in his grave, husky tone:

"I am not prepared to answer any further questions tonight, and I must ask honorable members to defer their judgment until Monday, when I hope to make a statement on behalf of His Majesty's Government."

And with that, unheeding the calls, he turned and walked behind the Speaker's chair and out of sight.

"Good God!"

Jim was white to the lips.

"That means war!"

Elk, who had fallen into a doze, woke with a start, in time to see his companion flying out of the House. He followed him along the corridor to Sir Joseph's room and knocked at the door. There was no answer. He turned the handle and walked in.

"The room was in darkness and empty. Rushing out into the passage, he lay down a messenger.

"No, sir, I've not seen Sir Joseph. He went into the House a few minutes ago."

By the time he got back Jim found the lobby crowded with excited members. The Prime Minister was in the West of England; the First Lord of the Admiralty, and the Secretary of War had left that afternoon to address a series of public meetings in the North; and already the telephones were busy scolding the other members of the Cabinet. He found no word which had seen Sir Joseph after he left the House until he came upon a policeman who thought he had recognized the Foreign Minister walking out into Palace Yard. Jim followed this clue and had him confirmed. Sir Joseph had come out into the Yard, taken a taxi (though his car was waiting) a few minutes before the detectives almost ran to Whitehall Gardens, and here they had a further shock. The Minister had not arrived at his home.

"Are you sure?" asked Jim incredulously, thinking the butler had orders to rebuff all callers. "Positive, sir. Why is anything the matter?" asked the man in alarm.

Jim did not wait to reply. They found a cab in Whitehall and went beyond legal speed to Park Lane. There was just a chance that the Foreign Minister had returned to Harlow's. When they reached Green-hart House there came to them the strains of a jazz band; dancing was in full swing, both in the library and in the large drawing room overlooking Park Lane. They found Harlow after a search, and he seemed the most astonished man of all.

"Of course, he hasn't come back here. He told me he was going to the House and then home to bed. What has happened?"

"You'll see it in the newspapers in the morning," said Jim curtly, and drove back to his glasses and replaced them again, nervously gripped the lapels of his coat and, leaning forward over the dispatch box, spoke:

"The right honorable gentleman is rightly informed," he began, and a hush fell on the House.

"Yes, I've heard all about it," he said, in his thin, rasping voice. "Where is Sir Joseph?"

He beckoned Jim, who was known to him, and, pushing his way through the crowd of members, went back

with him along the corridor to his room.

"Were you in the House when Sir Joseph spoke?" he asked.

"Yes, sir," said Jim.

"Just tell me what happened."

Briefly, almost word for word, Jim Carlton repeated the astonishing speech.

"He must be mad," said the Chancellor emphatically. "There is not a word of truth in the whole story, unless—well, something may have happened since I saw him last."

"Can't you issue a denial?"

Mr. Kirkknoll bit his lip.

"In the absence of the Prime Minister, I suppose I should, but I can't do that until I have seen Sir Joseph."

A thought struck Jim.

"He is not what one would describe as a neurotic man, is he?"

"No man less so," said the Chancellor emphatically. "He is the sanest person I've ever met. Is his secretary in the House?"

He rang a bell and sent a messenger in search, while he endeavored to get into touch on the long-distance phone with the absent Ministers.

The secretariat of Downing Street were evidently engaged in a similar quest, with the result that until 1 in the morning neither had managed to communicate with the head of the Government.

"We can't stop this getting into the newspapers, I suppose?"

"It is in," said the Chancellor laconically. "I've just had a copy of the first editions. Why he did it, I don't know. He has certainly smashed the Government. What other results will follow I dare not think about."

"What do you think will be the first result of Sir Joseph's speech?"

"The Minister spread out his hands."

"The markets, of course, will go to blazes, but that doesn't interest us so much as the feeling it may create in France. Unhappily, the French Ambassador is in Paris on a short visit."

Jim left him talking volubly on the Paris wire, and at 3 o'clock in the morning was reading a verbatim report of Sir Joseph Layton's remarkable lapse. The later editions carried eight lines in heavy type:

"We are informed by the Chancellor of the Exchequer that the Bonn incident has never been before the Cabinet for discussion, and it is not regarded as being of the slightest importance. The Chancellor informs us that he cannot account for Sir Joseph Layton's extraordinary statement in the House of Commons."

All night long Jim literally sat on the doorstep of Whitehall Gardens, waiting without any great hope for Sir Joseph's return. He learned that the Prime Minister was returning from the West by special train and that a statement had already been issued repudiating the statement of the Foreign Minister.

(To Be Continued)

Agricultural Products

Bacon, Cheese, Eggs And Poultry Purchased By Britain

Since Canada's export trade in most agricultural products is largely with the United Kingdom, the present and future demand for these products is almost entirely dependent on the course of the war itself and the policies of the United Kingdom government departments concerned with the food supplies, shipping, exchange, and allied matters, states the Current Review of Agricultural Conditions in Canada. Agreements have been negotiated between the Canadian and United Kingdom governments in connection with certain specific commodities such as bacon, cheese, eggs and poultry. United Kingdom imports of wheat have been purchased both on the open market and directly from the Wheat Board—Current Review of Agricultural Conditions in Canada.

Tuberculosis of the spine has been noted in human skeletons more than 10,000 years old.

Has Become Real Science

Successful Bombing From Air Is No Haphazard Job

Among laymen there appears to be a popular misconception that bombing from the air is a sort of trial-by-error process, with bombs dropped directly over a target and falling much like a Sigmund Freud might drop a brick from the upper story of a building. The truth is that bombing, like many other phases of modern warfare, is a highly scientific form of assault, based on precision of a hair's-breadth, and its timing determined by extremely sensitive instruments.

When a plane is in level flight, and a bomb is released, the bomb does not immediately drop downward; rather does it follow the same horizontal position as the plane, and its speed is also the same as that at which the plane is travelling. This horizontal trajectory continues until the bomb begins to lose its forward speed, and then it gradually slopes vertically toward the earth. The fins attached to it serve as rudders and prevent it from tail-spinning.

Wind drift, speed of the plane, and its altitude are all important factors in working out the trajectory a bomb must follow if it is to reach its mark. As a plane nears its objective, the navigator watches the bombing sight, which is the nerve centre of a bomber's finely-adjusted equipment and can be manipulated to resolve the intricate calculations and the several elements that precede the release of the missile. The plane's altitude may commonly be ten thousand feet, its speed two hundred miles an hour, and the target as yet two miles away. The pilot must now head his ship on the target, keep it there, and faithfully maintain altitude, while the navigator is still concentrating on the bombing sight. At the instant that the sight shows the target to be in perfect alignment, the bomb is released, under these calculations, at a point one and one-third miles ahead of the target. The forward flight of the bomb is 284 feet a second. By the time the plane is directly over its objective, the bomb, if everything has been worked out accurately, is just hitting its target and exploding. It all sounds difficult and, admittedly, it is not easy.

How all this can be done with consistent accuracy is perhaps hard for the layman to understand; but such is aerial warfare, as young British fliers are demonstrating it every day and night. Their aiming and timing of bombs are based on laws of mathematics and physics that are depended upon to produce an infallible result, all things being equal.

British bombers may yet bring Mr. Hitler to his knees.—Hamilton Spectator.

Used U.S. Planes

Canada Takes Over About Two Dozen For Training Purposes
Canada has taken over about two dozen second-hand fighting planes which the United States army air corps originally released to France shortly before that country's fall, it was learned.

The planes, which are obsolete as far as the U.S. army air corps is concerned, will be used for advanced training under the Commonwealth air training scheme. They are Northrup attack planes, and will be used temporarily in conjunction with the standard Harvard trainers while there is a shortage of Harvard planes.

War Expansion In Canadian Industry
The erection or enlargement of more than 100 industrial plants in Canada under the government's industrial development program now involves expenditures totalling some \$180,000,000. These will help provide for Canada's growing war needs.

Theory Declared Wrong

Abstaining From Meat In Summer Does Not Affect Body Heat

The old advice to eat less meat to keep cool in hot weather was shown to be exactly wrong in experiments reported to the American Chemical Society at Detroit.

The right way, said Dr. E. B. Forbes, director of the institute of animal nutrition at Pennsylvania State College, is to eat lean meat and other protein food as usual, and be careful about consumption of starch, sugar and fat.

The old theory rested on experiments in which each kind of food was fed by itself and meat, or protein, caused the greatest amount of body heat. In Dr. Forbes' experiments he fed proteins, fats and sugars all together and showed that under those circumstances the meats don't cause so much heat production.

HOME SERVICE

STRETCH FAMILY INCOME BY SIMPLE BUDGET PLAN

Have Money for What You Want
"Get the things I want? Why, I can't even pay for the 'musts,' people say. 'There's always a bill left over, a pet project put off. If only I had more money!'"
Budget—is the answer. Planned spending not only keeps run-away expenses in line but it actually seems to stretch your income.

Those bills that look like mountains are just the result of carelessness in spending and planning. By impulsive marketing you may have run up a grocer's bill that's 20 per cent over the amount your budget recommends.

For a family of three on \$125 a month \$10 a week is ample for food. Learning to use the cheaper cuts of meat and taking advantage of "specials" can save a lot of money. As much as \$8 a month (\$96 a year) to spend on your dearest desires.

As for unexpected dentist's bills, repairs to the house—they need never prove a burden. Your budget provides a fund for these "Large Occasional Expenses," enables you to pay taxes and other big bills without a qualm.

Make your money go further with a budget. Our 32-page booklet tells how to apportion your income according to your needs. Gives advice on buying, saving; has ruled pages for a year's accounts.

Send 15 cents in coins for your copy of "How to Budget and Buy for Better Living" to Home Service, Winnipeg, Newsworld, Unit 175 McDermott Ave. E., Winnipeg, Man.

The following booklets are also available at 15c each:

108—"Making Plans and Flowers Grow Indoors."

113—"Secrets of Successful Child Making."

112—"How to Make Slip Covers."

120—"The Meaning of Dreams."

164—"Party Games For All Occasions."

180—"What You Should Know About Nursing."

Canadian Research Council

Will Promote Research And Consider New Ideas Of Social Science

Organization meeting of the Canadian Research Council in Social Science was held at Ottawa and Prof. R. G. Trotter of Queen's University, Kingston, was elected president.

Membership in the organization will be restricted to 16 representatives of all branches of social science, elected for varied terms. Its purpose will be to promote research and consider new ideas of social science. Other members appointed to the executive were: J. E. Robbins, Dominion bureau of statistics, Ottawa, secretary-treasurer, and Prof. H. A. Innis, University of Toronto, Prof. F. C. Cronkite, University of Saskatchewan, and Prof. C. A. Dawson of McGill University, Montreal.

Prison For Dutch Worker

Because He Valued Queen Wilhelmina's Words More Than Hitler's
Reports from the Netherlands said that a Dutch worker was sentenced to a year and a half in prison by a German court at Utrecht for saying that "the words of the honorable Queen Wilhelmina are to be respected more than what German paperhanger says." The court ruled that this was an insult to Adolf Hitler and, thus, an insult to the whole German people.

A Disraeli Prophecy

British Statesman Wrote With Clear Vision In 1859

This prophecy of Disraeli's, written in 1859, would seem to be nearing its fulfillment; and it is indeed a heartening message from the past—

Remember always that England, though she is bound to Europe by tradition, by affection, by great similarity of habits and all those things which time alone can create and consecrate, is not a mere Power of the Old World. Her geographical position, her laws, her language, and her religion, connect her as much with the New World as with the Old. Still, if ever Europe by her shortsightedness falls into an inferior and exhausted state, for England there will remain an illustrious fulcrum.

We are bound to the communities of the New World, and those great states which our own planting and colonizing energies have created, by ties and interests which will sustain our power and enable us to play as great a part in the times yet to come as we do in these days, and as we have done in the past. And therefore... I say it is for Europe, not for England, that my heart sinks.—Mrs. I. Davey, in London Times.

GEMS OF THOUGHT

GREATNESS

Nothing can be great which is not right.—Samuel Johnson.

Great minds had rather deserve contemporaneous applause without attaining it than attain deserving it. If it follow them it is well, but they will not deviate to follow it.—Cotton.

Every luminary in the constellation of human greatness, like the stars, comes out in the darkness to shine with the reflected light of God.—Mary Baker Eddy.

Strength of character lies not in demanding special circumstances, but in mastering and using any that may be given.—Canon Scott Holland.

The workshop of character is everyday life. The uneventful and commonplace hour is where the battle is lost or won.—Malville B. Babcock.

The final proof of greatness lies in being able to endure contentedly without resentment.—Elbert Hubbard.

Go Straight Down

In these days of many ships sinking, it is interesting to note that when they sink, ships settle to the bottom immediately, almost directly below the place they were sunk, unless a sub-ocean current is encountered.

The tragedy of Germany is not that the people have become enslaved to a mad ideal, but that they no longer care to cancel their own captivity.

Herr Hitler is learning to his dismay that there's something tougher than masonry and concrete. It's the fighting spirit of the British people.

Lie detectors are used by police departments in 15 cities in the United States.

Help Smack Hitler

This New
WAR SAVINGS PLEDGE
has been mailed to you

SIGN UP FOR THE DURATION in Canada's Army of 2,000,000 Regular War-Savers

Be one of the first to enlist. You will be receiving your official enlistment blank—the new War Savings Pledge. Use it to instruct your bank to make purchases of War Savings Certificates for you every month—automatically. Your bank looks after everything for you—sends your money to Ottawa each month, and the Certificates are mailed direct to the registered holder. There is no charge for this service.

Here is an effective way to serve—and a sure way to save. And remember, too, you are not giving your money, but lending it, and at a good profit to yourself: a full 25% in 7½ years! So watch the mail for this new official War Savings Pledge. When it arrives, use it to Help Smash Hitler. Additional Pledges are available at your bank or from your local War Savings Committee. Sign up now!

"You Serve by Saving" Invest Regularly in War Savings Certificates

BEER

for the
REST that RESTORES

Thirst-quenching, health-giving... beer is a delicious beverage and a wholesome food in solution. Rich in nourishment fresh from Fertile fields of hops and Barley. With the first sip... relaxation, the ideal condition, mental and physical for any food to begin its work of rebuilding Beer is Nature's favored and most economical refreshment... because first it rests, and then restores.

THE TRUTH ABOUT THE RED CROSS

(By DEAN WILSON)

The regular meetings of the Chinook Red Cross Society were resumed on Sept. 18 in the Club Room of the Chinook Hotel. Much importance was attached to this meeting as:

1. Plans formulated to assist in the National Appeal Drive, will take the form of a Concert and Dance on October 25.

2. Conclusive proof was given to the members present, that at no time was any official of the Red Cross, either voluntary or paid, authorized to sell Red Cross supplies. It might be worth while to briefly summarize a few of the points considered.

It has always been the endeavor of the Red Cross to counteract propaganda of this nature because not only is it unfair criticism of the Red Cross, but it is also detrimental to our winning the war. If you hear a rumor unfavorable to the Red Cross report it to your local Red Cross branch or to Red Cross Headquarters—complete investigation will follow.

If you hear that the Canadian Red Cross Society is selling socks knit by patriotic women for soldiers and sailors it's a falsehood. The Red Cross has never been able to obtain proof that socks so made are being sold. The Canada has been officially denied a score of times, but is still circulating.

Nearly two million dollars have been devoted to the purchasing of materials for the voluntary making of all types of supplies by 9,000 groups of women in all parts of the country. Not one article of these supplies has ever been sold by the Canadian Red Cross Society.

Behind the Headlines At Ottawa

usual, existing in other nations for years without any complaints or adverse criticisms. The peak of the first phase of post-war reconstruction began there into being the Bank of International Settlements and other satellite institutions. Following a changing world economy from 1931 to 1939, in almost all countries a degree of regulation of the monetary system was set up that would have been unthinkable in the 19th century and that would be necessary to go back as far as the 18th century to find comparable examples for such a state of affairs, studying policies like those of Sir Thomas Gresham who controlled the Flemish quotations for the pound sterling. Though the mechanisms developed and the reasons for them were many in all foreign exchange control actions by all nations, yet Germany, with 25 separate boards, was the first nation to introduce exchange control that was ruthlessly cheap and increasingly complex in order to provide an artificial "favorable balance of trade" as an iron hand policy even in this regard by an official exchange rate which was really an arbitrary figure which had no relation to the actual economic conditions in that country. In other nations the foreign exchange value of the currency was depressed, particularly in the United States and Britain, with the latter going off the gold standard for inescapable reasons and the former following this action by devaluing its currency. Then again, while some nations set up very powerful stabilization funds, others established elaborate machinery for the purpose of maintaining the foreign exchange quotations for their national currency at a figure substantially above the purchasing power parity, though in all cases temporary and slight advantages may have been gained by halting price declines and expanding foreign trade where possible.

As a direct result of this dogmatic policy, Canada's financial machinery in this war is unusually good order for a nation that depends so heavily upon foreign trade and foreign investments. First, there has been no export of capital from Canada of any marked importance. Second, stability has been preserved in all security markets, credits, and financing of war materials on large and successful scales. Third, exchange rates have remained unchanged since September 15, 1939. Fourth, this war has not lessened the ability to buy essential supplies. In other words, as time marches on in this war, Canada's fortunes may go up and down with sacrifices following the same temporal movement, but under present regulations of foreign exchange as well as other economic actions, nervous capital will not get any chances to disrupt normal activities, nor cause any radically-varying appraisals of Canada's economies in this struggle.

If this elucidation of foreign exchange control which is one of the most troublesome and fallacious war measures, is well understood by the people of Canada, the authorities on Parliament Hill would undoubtedly breathe a sigh of relief.

BRITAIN NEVER CEASES WORK ON ARMS

21 hours a day for seven days—that is the way Britain works on her arm. With such an effort, therefore, it doesn't take long to produce a stock of rifles such as this.
